CONTENTS

Volume 38, Issues 1–8

International Journal of
MATHEMATICAL EDUCATION in SCIENCE and TECHNOLOGY

Issue No. 1, JANUARY

The effect of promoting heuristic literacy on the mathematical aptitude of middle-school students B. KOICHU, A. BERMAN and M. MOORE 1

Counting on the basics: mathematical skills among tertiary entrants T. M. WILSON and H. L. MACGILLIVRAY 19

Activity-based introduction to the binary system: Nim game winning strategy A. VANINSKY 43

Student evaluation of mathematical statements using dynamic geometry software J. CONNOR, L. MOSS and B. GROVER 55

Introductory statistics, college student attitudes and knowledge – a qualitative analysis of the impact of technology-based instruction M. MELETIOU-MAVROTHERIS, C. LEE and R. T. FOULADI 65

A complete description of cones and polytopes including hypervolumes of all facets of a polytope F. JUBETE and E. CASTILLO 85

Antagonistic and bargaining games in optimal marketing decisions S. LIPOVETSKY 103

Classroom notes

How important is a cricket test match? P. GLAISTER 115

Partial row-sums of Pascal's triangle R. L. OLLERTON 124

Continuity and separation in symmetric topologies J. HARRIS and M. LYNCH 127

Enrichment exercises through extension to rhotrices A. MOHAMMED 131

A simple geometric method of estimating the error in using Vieta's product for π T. J. OSLER 136

Issue No. 2, MARCH

Technologies for teaching and learning trend in bivariate data P. A. FORSTER 143

Plane transformations in a complex setting II: isometries T. DANA-PICARD 163

Operator factorization and the solution of second-order linear ordinary differential equations W. ROBIN 189

The development of conditional probability reasoning J. M. WATSON and B. A. KELLY 213

Differentiability in several variables revisited K. SPINDLER 237

Classroom notes

A simple algorithm for computing partial fraction expansions with multiple poles Y.-K. MAN 247

Fundamental theorem of calculus for Lebesgue integral J. TONG 251

History of mathematics and problem solving: a teaching suggestion V. MEAVILLA and A. FLORES 253

Shadow maps for real terrain D. G. KNIGHT 259

The remainder theorem and factor theorem for polynomials over noncommutative coefficient rings D. E. DOBBS 268

Contextual approach in teaching mathematics: an example using the sum of series of positive integers T. T. LAM 273

Issue No. 3, APRIL

TDmat – mathematics diagnosis evaluation test for engineering sciences students J. S. PINTO, M. P. OLIVEIRA, A. B. ANJO, S. I. VIEIRA PAIS, R. O. ISIDRO and M. H. SILVA 283

Effects of gender and ethnicity on fourth graders' knowledge states in mathematics M. BIRENBAUM, F. NASSER and C. TATSUOKA 301

An investigation into the mathematics achievement and attitude towards mathematics with respect to learning style according to gender N. ORHUN 321

Language genre transitions in a secondary school physics classroom M. W. BOWER and N. F. ELLERTON 335

The interaction between intuitive and formal mathematical thinking: a case study V. FARMAKI and T. PASCHOS 353

A layer framework to investigate student understanding and application of the existence and uniqueness theorems of differential equations D. RAYCHAUDHURI 367

A structural connection between linear and 0–1 integer linear formulations V. ADLAKHA and K. KOWALSKI 383

Classroom notes

Sequences of definite integrals T. DANA-PICARD 393

Structural analysis of Pythagorean monoids M.-Q.ZHAN and J. TONG 402

A random walk phenomenon under an interesting stopping rule S. Chakraborty 407

On some confidence intervals for estimating the mean of a skewed population W. Shi and B. M. Golam Kibria 412

Exponential curve fitting with least squares P. Glaister 422

Issue No. 4, June

An index to measure the ability of first year science students to transfer mathematics A. L. Roberts, M. D. Sharma, S. Britton and P. B. New 429

Few fractional order derivatives and their computations D. D. Bhatta 449

Mathematical under-preparedness: the influence of the pre-tertiary mathematics experience on students' ability to make a successful transition to tertiary level mathematics courses in Ireland M. Hourigan and J. O'Donoghue 461

Irrational numbers on the number line – where are they? N. Sirotic and R. Zazkis 477

An algebra content upgrading course for in-service mathematics teacher: a Singapore experience T.-L. Toh 489

Responsive curriculum design in a statistics service unit P. F. Coutis 501

Nonlinear resonance and Duffing's spring equation II T. H. Fay and Stephan V. Joubert 517

Classroom notes

Constructing a line segment whose length is equal to the measure of a given angle W. Jacob and T. J. Osler 531

Generating functions for the powers of Fibonacci sequences D. Terrana and H. Chen 533

Evaluation of mean and variance integrals without integration A. H. Joarder and M. H. Omar 540

A note on the visibility in the $[1, N]\times[1, N]$ integer domain G. D. Kim and J. Engelhardt 545

Solving quartics R. G. Kulkarni 551

A converse of Fermat's Little Theorem P. S. Bruckman 556

Case study projects for college mathematics courses based on a particular function of two variables Y. Shi 557

A simple proof of the generalized Ceva theorem by the principle of equilibrium Y.-K. Man 567

Issue No. 5, JULY

Undergraduate research in mathematics as a curricular option D. BROWN and O. YÜREKLI 571

Team teaching and cooperative groups in abstract algebra: nurturing a new generation of confident mathematics teachers R. GRASSL and T. T. Y. MINGUS 581

Using dynamic geometry to stimulate students to provide proofs A. WARES 599

Interpreting a graph and constructing its derivative graph: stability and change in students' conceptions B. UBUZ 609

Writing in groups as a tool for non-routine problem solving in first year university mathematics J. A. TAYLOR and C. MCDONALD 639

The row–column multiplication of high dimensional rhotrices B. SANI 657

Classroom notes

The dynamics of odd sawtooth functions D. SPROWS 663

The remainder method for sample percentiles A. H. JOARDER and M. R. ABUJIYA 667

Fibonacci imposters C. S. SIMONS and M. WRIGHT 677

Magic squares with magic inverses J. GUYKER 683

A simple game to derive lognormal distribution E. OMEY and S. VAN GULCK 689

Relations between roots and coefficients of cubic equations with one root negative the reciprocal of another M. A. ASIRU 695

Divisibility by 4 and 8 for smaller natural numbers S. CHAKRABORTY 699

Affine contractions on the plane D. ÇELIK, Y. ÖZDEMIR and M. ÜREYEN 701

The effect of data scaling on dual prices and sensitivity analysis in linear programs V. G. ADLAKHA and R. R. VEMUGANTI 708

Issue No. 6, SEPTEMBER

Graduate attributes: teaching as learning L. N. WOOD and N. F. SMITH 715

A choice option between proofs in linear algebra R. J. RENSAA 729

Critical points for certain statistical measures of agreement M. FEUERMAN and A. R. MILLER 739

Mathematical building-blocks in engineering mechanics D. M. BOYAJIAN 749

Engineering students' conceptions of the derivative and some implications for their mathematical education E. BINGOLBALI, J. MONAGHAN and T. ROPER 763

How to show one-fourth? Uncovering hidden context through reciprocal learning S. Abramovich and P. Brouwer 779

Classroom notes

Inspiring examples in rearrangements of infinite products W. Ramasinghe 797

Using asymptotic results to obtain a confidence interval for the population median M. Jamshidian and M. Khatoonabadi 805

Some results related to the integral mean value theorem P. K. Sahoo 818

Probability issues in without replacement sampling A. H. Joarder and W. S. Al-Sabah 823

Circuit analysis as a discrete boundary value problem R. Abu-Saris and W. Ahmad 832

A refined Cauchy–Schwarz inequality P. R. Mercer 839

Surfaces of revolution in n dimensions D. Aberra and K. Agrawal 843

A strange property of the determinant of minors A. O. Ajibade and M. A. Rashid 852

Issue No. 7, October

Special Issue The Sixth Southern Hemisphere Conference on Undergraduate Mathematics and Statistics Teaching and Learning, Patagonia, Argentina, 26–30 November 2007
Edited by Victor Martinez-Luaces and Cristina Varsavsky

Foreword: Vision and change for a new century V. Martinez-Luaces and C. Varsavsky 859

A self-assessment test for incoming students S. Britton, D. Daners and M. Stewart 861

An effective preparation for tertiary mathematics S. Parnell and M. Statham 869

Competence in mathematics – more than mathematical skills? T. Steyn and I. Du Plessis 881

Three different teaching approaches in pre-calculus bridging mathematics B. Miller-Reilly 891

Learning in lectures: multiple representations L. N. Wood, S. Joyce, P. Petocz and M. Rodd 907

Estimative abilities in probabilistic judgments of engineering students M. I. Cavallaro, M. Anaya, E. García Argiz and P. Aurucis 917

Embodied, symbolic and formal thinking in linear algebra S. Stewart and M. O. J. Thomas 927

Can you show you are a good lecturer? L. N. Wood and A. Harding 939

University of Wisconsin-Milwaukee mathematics focus courses: mathematics content for elementary and middle grades teachers K. McLeod and D. Huinker 949

Sibling curves and complex roots 1: looking back A. Harding and J. Engelbrecht 963

Sibling curves and complex roots 2: looking ahead A. Harding and J. Engelbrecht 975

Issue No. 8, December

Assessing elementary algebra with STACK C. J. Sangwin 987

A brief historical introduction to solitons and the inverse scattering transform–a vision of Scott Russell L. Debnath 1003

Numerics–characteristics–asymptotics: a case study from large scale ocean circulation P. F. Hodnett and C. Courtney 1029

Synthetic division and matrix factorization S. Barabé and F. Dubeau 1051

The notion of compartmentalization: the case of Richard A. Eraslan 1065

A case study of dynamic visualization and problem solving I. Lavy 1075

Classroom notes

The Moore–Penrose inverse of block magic rectangles Y. R. Hakopian and A. N. Eloyan 1093

A new way to evaluate the Probability and Fresnel integrals P. Khalili 1102

Two related parametric integrals T. Dana-Picard 1106

Unitary response regression models S. Lipovetsky 1113

Improved second derivative test for relative extrema Y. Wu 1121

Erratum 1125
